Ghaziabad, Uttar Pradesh, India • +91 9315825047 • [LinkedIn](#) • [GitHub](#)

PROFESSIONAL SUMMARY

Computer Science & Engineering undergraduate (CGPA 8.36) at ABES Engineering College with hands-on experience building responsive web applications using HTML5, CSS3, and JavaScript. Proficient in MongoDB for back-end data management and experienced with Git & GitHub for version-controlled collaborative development. Passionate about creating clean, user-friendly digital experiences and writing efficient, reusable code. Actively developing JavaScript (ES6+) skills and familiar with REST API integration concepts. Seeking an entry-level Web Developer opportunity to contribute to real-world projects and grow across the full web development stack.

SKILLS

Front-End	HTML5, CSS3, Responsive Web Design, Cross-Browser Compatibility, Basic UI/UX Principles
JavaScript	JavaScript (ES6+ — actively learning), Browser Developer Tools, Debugging
Back-End / DB	MongoDB, SQL, REST API integration concepts
Tools & DevOps	Git, GitHub, VS Code
Core CS	Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks
Other Languages	C++, SQL
Soft Skills	Problem Solving, Communication, Team Collaboration, Leadership, Adaptability

EXPERIENCE

Community Technology Coordinator (Volunteer) | Unnat Bharat Abhiyan (UBA) — ABES Engineering College | 2024 – Present

- Assisted in designing and delivering technology-driven solutions for rural community projects, applying web and digital communication skills.
- Coordinated cross-functional team outreach and prepared structured documentation and proposals — mirroring collaborative development and reporting workflows.
- Applied problem-solving and adaptability skills across community projects, reflecting the debugging and troubleshooting mindset required in web development.

PROJECTS

Gamified Learning Platform | Personal / Academic Project | 2024

- Designed and developed a fully responsive web application with clean, structured HTML5 and CSS3 — ensuring cross-browser and cross-device compatibility across screen sizes.
- Implemented MongoDB as the back-end database for user data storage, progress tracking, and persistent state management — reflecting real-world full-stack data integration.
- Designed SQL-based analytics dashboards to monitor user performance metrics, demonstrating ability to work with structured data and build data-driven web features.
- Built gamification features (badges, rewards, leaderboards) requiring dynamic, reusable front-end components and structured back-end data integrity — aligned with REST API and state management principles.
- Managed the entire project using Git version control with clean commit histories and collaborative branching workflows, maintaining code quality and traceability.

- Optimized the UI for usability and performance, applying basic UI/UX principles to improve user engagement and interface clarity.

EDUCATION

B.Tech — Computer Science & Engineering | ABES Engineering College, Dr. A.P.J. Abdul Kalam Technical University | 2024 – 2028 (*Expected*)

- Current CGPA: 8.36 / 10.0
- Relevant Coursework: Data Structures & Algorithms, OOP, Database Management Systems, Operating Systems, Computer Networks

CERTIFICATIONS

- Active participant in AI and Prompt Engineering learning programs (2024–Present)

(Pursuing certifications — e.g., Meta Front-End Developer, freeCodeCamp Responsive Web Design, JavaScript Algorithms & Data Structures)

ACHIEVEMENTS

- Maintained CGPA of 8.36/10 in first year of B.Tech CSE, demonstrating strong academic performance in core Computer Science subjects.
- Independently built and deployed a full-stack gamified learning platform as a first-year student, demonstrating initiative, technical skill, and end-to-end project ownership.
- Recognized contributor at Unnat Bharat Abhiyan for technology-led community project coordination and outreach.
